

# JOSHUA KESSELL

## FULL STACK WEB DEVELOPER

### PROFILE

Experienced fullstack web developer with 6+ years of professional programming experience, including full lifecycle application development, modern frontend engineering, and DevOps integration. Known for effective communication, fast learning, and driving business outcomes with scalable code in an Agile working environment.

### PROFESSIONAL EXPERIENCE

#### TEKsystems Global Services

OCT 2018 - MAR 2025

Joined as a junior developer and quickly adapted to diverse client environments, learning on-the-fly with minimal prior experience. Successfully delivered on four enterprise projects across aviation, automotive, healthcare, and government sectors, consistently meeting client expectations.

#### Android Java Developer at United Airlines

2022 - 2025

- Developed and maintained a suite of Android apps used to track passenger luggage.
- Integrated RESTful API using Java and Spring Boot to support real-time updates.
- Implemented a PIN login system for a streamlined cross-app login experience.
- Selected to partner with a small group of senior developers to convert a React web app to Java/Android on an especially accelerated timeline, completing the app rewrite from scratch within a single month.

#### Backend Java Developer at GM / OnStar

2021 - 2022

- Built fulfillment API using Spring Boot and Kafka.
- Learned Kafka on-the-job, contributing without prior experience

#### Angular Developer at Reliant Healthcare

2020 - 2021

- Modernized .NET platform into Angular 10 web app
- Gamified training modules to boost engagement
- Ensured secure backend data flow through cross-team collaboration

#### Automation Engineer at Perspecta

2019 - 2020

- Automated server migration using Ansible scripts
- Deployed CI/CD pipelines to AWS GovCloud
- Project concluded early due to COVID-19

#### Full Stack MERN Capstone Project

2019

- Built real-time chat app with React, Node, Express, and MongoDB using web sockets.
- Later migrated backend to Spring Boot and added secure authentication.

#### Software Support Analyst at Intuit

2017 - 2018

Delivered technical support to accountants using Intuit tax software, resolving complex issues during peak tax season.

#### Platform Support Analyst at Texas Instruments

2016 - 2017

Provided internal support at Texas Instruments by resolving platform issues, streamlining cross-team communication, and reviewing sample component requests for engineering designs.

#### At-Home Chat Advisor at Apple

2014 - 2016

Provided live chat support for AppleCare, resolving technical issues across multiple customers simultaneously while leading team discussions and maintaining a high-performance remote workspace.
